PROFESSIONAL SUMMARY

AI Engineer with expertise in Machine Learning, Data Engineering, and NLP. Proven track record in developing predictive models, data standardization applications, and analytical dashboards. Strong collaborator with excellent problem-solving and communication skills.

SKILLS

- | | |
|--------------------|-------------------------------------|
| • Machine Learning | • SQL |
| • Python | • Big Data |
| • TensorFlow | • ETL |
| • PyTorch | • Natural Language Processing (NLP) |
| • Scikit-Learn | • Data Visualization |
| • Data Engineering | • Power BI |

PROFESSIONAL EXPERIENCE

AI Engineer Apprentice, CNRS - Institut de Neurosciences de la Timone | Marseille, France

2023 - Present

- Designed and developed a BIDS-compliant data standardization application, including testing and deployment
- Led requirement gathering and user feedback sessions to improve application features
- Created metadata forms for different modalities using Elab

EDUCATION

Master's in Artificial Intelligence, Université d'Avignon

2025

Bachelor's in Software Engineering, Université d'Avignon

2023

PROJECTS

Bank Customer Churn Prediction (Python, Scikit-learn, Pandas, NumPy)

Developed ML model to predict customer churn for a banking institution, improving retention strategies.

Sales Analytics Dashboard (Power BI, Qlik, SQL)

Created interactive dashboards for sales, margin, and revenue analysis using Power BI and Qlik.
